

Planting Season is Here!

A Guide to Recycling in the Spring

Did you know that the plastic pots and trays that your flowers, plants and vegetables come in are not recyclable in your weekly trash pickup?

Don't worry, you can still do your part. Here are a couple of options:

- On specified days in the late spring, you can bring your plastic pots and trays to church and the Earth Care team will collect them and take them to a recycle site. Watch the bulletin — the dates will be announced.
- You can take these items yourself to any Lowe's store to be recycled.
